RE: Truck Route Detour and Downtown Street Closures

Although the fire at the Hedderich's building in downtown Williston has been extinguished, crews will continue to work on scene performing inspections, containment, and cleanup operations.

The truck route through downtown was opened this morning at 0100am to through traffic and most access points in downtown were restored. **Small sections of Main Street, 2nd Street and the Hedderich's alley remain closed to through traffic in the immediate vicinity of the Hedderich's building, as shown on the attached map.** We urge motorists to use caution when navigating these areas downtown and thank everyone for their patience as crews continue to work in the area.
